

Harbourside Cohousing

We welcome visitors by appointment only (see below). Privacy is important to us and we are busy living our lives so **please** do not wander onto our property and stay on the street or sidewalk. Please do not go down the two private driveways or approach members' homes unless you are with a tour guide from our community.

About Us

Harbourside Cohousing opened in January 2016 after five years of planning and development. Our focus is on flourishing in community in the second half of life. Our community on the Sooke waterfront includes 31 strata-titled units (avg size 845 sq ft) and about 4,000 sq ft of common space, mostly in a converted resort building. We are a Built Green Canada's Gold standard of energy efficiency community.

Our Mission

To be a sustainable senior cohousing homeowner community that promotes healthy aging in place but is not age restricted. The physical structures as well as the social fabric of our community nurture an innovative culture with lively connections to the larger society. While respecting personal privacy, we foster cooperation, social connection and affordability through design and through mutual support.

If you'd like to visit our community, please join us for a pre-arranged tour. Regular tours are offered by donation at 10 a.m. on the fourth Saturday of each month. Please email to reserve your place on a tour or inquire about whether a special tour could be organized for you
